Erpici a Denti

I nostri erpici a denti sono costruiti in diverse versioni e in diverse larghezze da 200 a 400 cm, per soddisfare al massimo tutte le esigenze dell'agricoltore su tutti i tipi di terreno. Sono costruiti a struttura incrociata con laminato ad U garantendo la massima robustezza e nello stesso tempo una rapida sostituzione dei denti.

Tooth harrows

Our Spike Harrows come in more series ranging in width from 200 to 400 cm to address the particular needs of the farmer on all the soil. They are built with laminated u-shaped iron in a criss-cross pattern so as to provide maximum strength. The sikes are mechanically jointed to provide strength and a perfect fit while allowing for rapid substitution.
